

# Sight Full Glass

Digital screens and display units for windows and doors

## Description

Sight Full Glass is the **55" 4K Led Display Totem**.

An excellent tool to digitise your communication, making it effective and interactive through the transmission of digital content, creating an Infopoint.

Furthermore, by displaying the screen in your shop window, you can show content such as products, promotions, videos, at any time of the day, including closing days. In this way, your point of sale is transformed into an important means of communication capable of attracting the attention of passers-by at all times.

Being a self-standing structure, the totem is easily transportable. This makes it perfect for trade fairs, events and exhibitions in shopping centres, displaying the catalogue in digital format and the contents in real format. Sight Full Glass is made of solid materials and durable electronic components, without sacrificing an elegant and extremely compact design that makes it perfect for any type of space.
