

# SIGHT

E S S E N T I A L

**Voi**lap  
digital

The same feeling of the real window  
but **configurable in every detail**

### Everything is simple

Present every variant found in the catalogue and makes it easy to choose and configure your products

### A unique design

Thanks to the no bezel structure it is possible to insert the display inside a wall to replicate a real window

### Brilliant Images

The highest brightness of the range and 178 ° of vision without ever losing the brilliance of every detail

### Easy to use

All commands at your fingertips, manage Sight from your favorite device with a touch

## What's inside

# VIEW

View is a CPQs web platform that permits to present, configure and sell your products through simple, immersive digital instruments.

When View is connected to SIGHT it becomes a real attraction, capable of bringing new customers to your point of sale, engaging them in a new immersive shopping experience

Full HD, life size images.

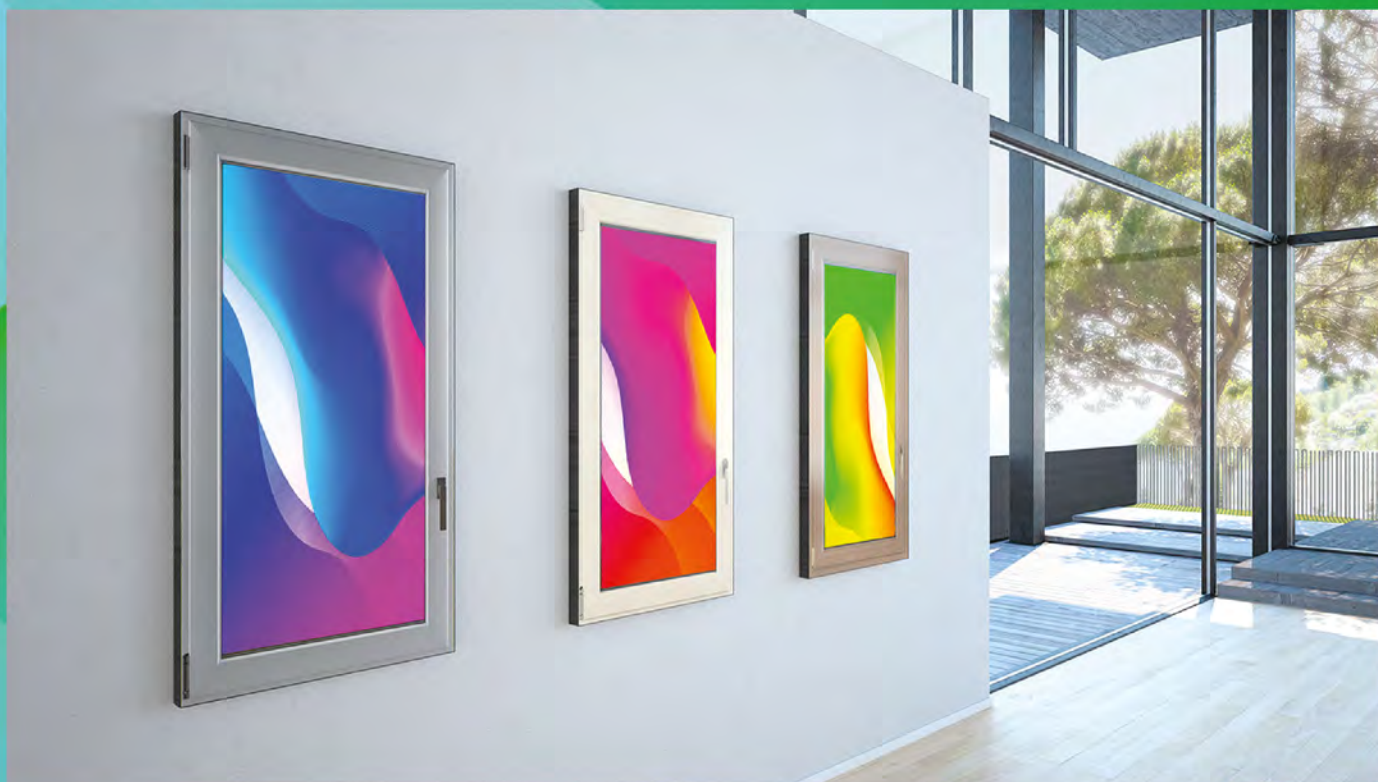

# theTail

The tail is the ultimate media player for every 4.0 point of sale. It permits you to play all your contents directly through SIGHT: load your videos, logos, photos, advertisements and promotions.

A Smart system that can organize, programme and visualize all your products that represent your brand.

# Discover new ways to promote and sell your products

Digital presentation of your products
